

- Close doors and heating vents in rooms rarely used and lower the thermostat and use a space heater in rooms you use. For every one degree lowered, you'll save up to 5% on your heating bill in the winter.
- Unplug chargers such as cell phones and iPods when not in use. Only 5% of the power drawn by a cell phone charger is used to charge the phone. The other 95% is wasted when it is left plugged into the wall.
- 25-40% of all heating or cooling produced by your furnace or air condition unit is lost through leaky ductwork. Fix the duct work and save an extra \$160 on the annual heating and cooling bill.
- Save on gas. For every mile per hour over 55 that is driven, the fuel economy drops 2%.
- Line drying is free. Savings in energy costs alone total up to \$135 a year.
